

## Weekly report

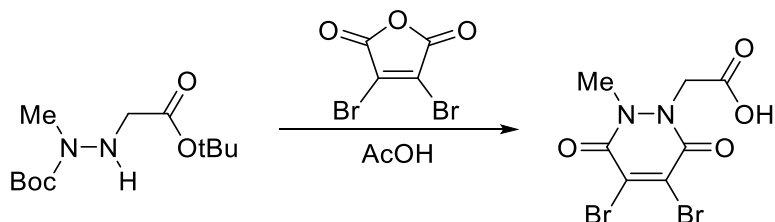

11/09/15 – 17/09/15

Antoine Maruani

### Synthesis

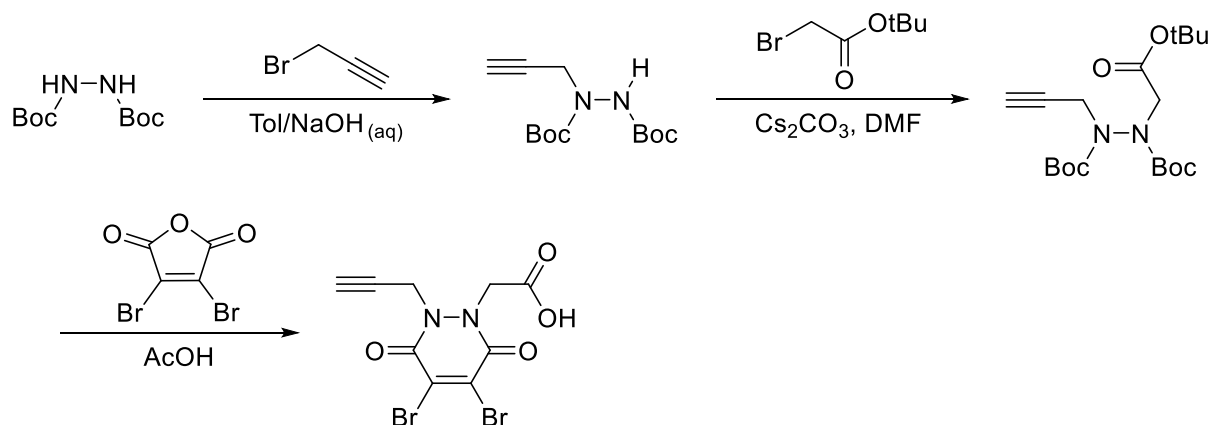

#### Methyl-Acid PD

- Purified Me-Boc-tBu ester-Hydrazine and finished the synthesis. I had *ca.* 500 mg after recryst but for some unknown reason, after a quick column supposed to get rid of a minor impurity, I ended up with only *ca.* 200 mg (NMR pending but TLC looked good). I gave 100 mg to João and Eifion.

#### Alkyne-acid PD

- Finished the synthesis. I now have *ca.* 1.4 g.

### Other

Thesis submitted!
